***Reasons for Allowance***

1. Claims 1-2, 4-17 and 20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Molbak (Patent No. 5,620,079) discloses a coin sorting and counting machine for dispensing to the user cash vouchers and store coupons. The machine is capable of detecting and clearing certain jamming condition automatically while counting the coins without requiring intervention by store personnel. In addition, the machine initiates a remote call to a central location for reporting a malfunction that it can not automatically fix. Molbak can not issue a command from the central location to resolve at least one of the reported malfunction.

Courtney (Patent No. 6,385,772) teaches a monitoring apparatus that also permit remote control of a camera via a wireless connection to the Internet.

And Molbak (Patent No. 5,957,262) is an improvement of Molbak USPN 5,620,079 above to include a more comprehensive of self-evaluation of a malfunction. However, similarly, it can not issue any command from the remote location to fix at least one uncorrected error.

None of these references taken either alone or in combination discloses a method and device for managing a field device, particularly a vending machine, having all the claimed features of applicant's instant invention, specifically including: receiving commands from the network operations center transmitted via a wireless network to correct at least one uncorrected error condition on the vending machine. Also, there is no motivation to combine the Molbak references with the Courtney reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.
